Hi Vicki,

We plan to send you the revised BaP files by the end of the day.

Thanks very much,

Julie

Hi Heather,

Kathleen Newhouse went through the BaP documents and she had the following minor things that needed changed. She asks that you keep the comments that are there in the document for now. Would it be possible for you to

finish by Thursday? Please let us know. Also, I think this would still be under the original TD but if not, let me know that too and we can generate a new one.

Thanks so much...
Vicki

I have finished going through the BaP tech edit and accepted the changes I agree with. I have attached the most recent clean copy of the tech edit with changes accepted. There are a few residual items that should be updated:

Ex. 5 Deliberative Process (DP)

All in all, I thought this tech edit was timely and well done.

I have added a few comment bubbles to denote the spots above that I think need some extra consideration. Please let me know if I can elaborate on anything.

Thanks,

Kathleen

Hi Kathleen,

Not sure if you want to work with the Hero or Heronet files so I left both versions attached.

Terri

Terri and Vicki,

The revised benzo[a]pyrene toxicological review and supplemental information documents are attached, with both HERO and HERONET links. All non-formatting changes are tracked and you will note several comments embedded in the text needing EPA attention.

Thank you very much,
Heather Printup

Hi Julie,

It's not necessary to submit another cost estimate. I'll just add a note to the file.

Thanks,
Terri

Hi Terri and Vicki,

We anticipate that the work on the preamble for BaP may require an additional 12 hours that were not considered in the original cost estimate. Please let me know if you would like me to provide a revised cost estimate for your approval.

Thanks very much,

Julie

Good morning,

Our information scientists have reviewed what was done for RDX and determined that the best course of action will be to add HERO links to each of the ~130 citations in the preamble of BaP, but copy and paste the reference section directly from RDX. They also indicated that it would be best if the section numbers in the citations are marked as suffixes to the HERO links as was done in RDX. Please let us know if this acceptable with BaP Team. If it is still the preference of the BaP Team to have the sections numbers black with no underline, we can accommodate that manually before delivery. However, please note that if the document needs to be updated due to changed/added references, the citations will turn back into hyperlinks.

Julie Melia will be following up to discuss the costing for this work.

Thank you,
Heather

Hi Julie and Heather,

Would it be possible to see if we could add the HERO links to the preamble of the BaP document. For the intext references where there is a section number, we would like the section number included in the link also. This is how it was done for TMB and Ammonia. We can provide one of these documents as an example. Please let me know how that would affect the timing and the cost. I can provide an updated TD.

Thanks so much,

Vicki

Hi Terri,

The SRC cost estimate for reformatting and editing of the BaP Toxicological Review is attached. We plan to deliver the revised documents to EPA on August 21, 2014. Please let me know if you have any questions or need further information.

Thanks very much,

Julie
